TECHNICAL SKILLS

Mobile Development: Android Studio, Kotlin, Java, Jetpack Compose, Kotlin Coroutines & Flow, Room DB, MVVM
Languages & Core: Python, TypeScript, JavaScript (ES6+), SQL, PostgreSQL, Data Structures & Algorithms, OOP
Tools & Architecture: Git, GitHub, Docker, AWS, GCP, Firebase, RESTful APIs, Google Play Console
UI Design & Agility: Figma, Adobe XD, Component-Driven Design, Responsive Layouts, Agile Development

EXPERIENCE

Sky IT Ltd

Dubai, UAE

Software Engineer (Android)

Apr 2023 – Sep 2023

- Led native Android development using Kotlin and Jetpack Compose, architecting the application's core UI layer and successfully shipping '**Komet**' to the Google Play Store as the foundational engineer.
- Integrated **5+ asynchronous RESTful APIs** and machine learning features, utilizing defensive coding patterns to maintain smooth UI thread performance and robust application data consistency.
- Triageed and resolved a critical thread-blocking Android Manifest bug within the GPS integration layer, reducing production crash rates by **25%** and measurably increasing average user session duration.
- Owned the end-to-end Google Play Store release pipeline, collaborating cross-functionally with PMs, UX designers, and backend teams in an Agile environment to hit tight delivery milestones.

Northeastern University

San Jose, CA

Graduate Teaching Assistant (Algorithms)

Sep 2025 – Dec 2025

- Mentored **50+ graduate students** in runtime optimization and complex data structures, including graph traversals (BFS/DFS), dynamic programming, sliding windows, and two-pointer techniques across weekly office hours.
- Conducted **10+ mock technical interviews** focusing on time/space complexity analysis, algorithmic pattern recognition, and robust edge-case handling.

Research Assistant (HCAI Lab)

Jan 2026 – Apr 2026

- Programmed the modular Python backend infrastructure for AEGIS, a 5-agent adaptive system utilizing FastAPI to handle deterministic routing matrix logic and reduce execution routing exceptions by **15%**.

PROJECTS

PronunciAid | *JavaScript, Chrome Extension API, HTML/CSS* | [Chrome Web Store](#)

Dec 2025

- Engineered a high-performance Chrome extension using content scripts and context menu APIs, optimizing lookup speeds by **3× improvement** (reducing latency from 15s down to 2s) to achieve a **5-star rating**.
- Fabricated an inline UI injected seamlessly into the DOM without page reloads, ensuring **100% host-page compatibility** and strict memory lifecycle management.

MyReccBox | *Next.js, TypeScript, Supabase, PostgreSQL, Vercel, REST APIs* | [Live](#)

May 2026 – Present

- Rapidly prototyped and shipped an end-to-end recommendation aggregator at a hackathon within a **3.5-hour constraint**, establishing real-time synchronization via Supabase subscriptions.

EDUCATION

Northeastern University

San Jose, CA

Master of Science in Computer Science (GPA: 4.0)

Sep 2024 – May 2026

Middlesex University Dubai

Dubai, UAE

Bachelor of Science (Hons) in Information Technology (First Class Honors)

Sep 2018 – Jun 2021
